

## KENZEN® IMMUNITY (US) 30 CAPSULES

PRODUCT CODE: 1512

Kenzen® Immunity is a combination 14 different mushrooms, each carefully chosen for its specific profile of compounds and relationship with immune response.\* Each of the 14 is structurally different at the molecular level. Six strains are exclusive to Nikken and developed to the highest concentration of beneficial compounds. It would be virtually impossible to include all these types of mushrooms in a regular diet, especially since the rare varieties are not available in conventional mushroom products. Kenzen Immunity combines them in order to provide a wide-spectrum range of natural biochemicals. Grown under laboratory conditions to optimize their beneficial ingredients,\* the formulation includes mushrooms rich in alpha and beta glucans, specialized sugars that the human body cannot produce on its own. A whole-food product, our mushrooms are sourced from regions around the world, including the desert of Nigeria, the southern highlands of Brazil and the highest levels of the Himalayas in Tibet and Nepal.
